

ModelAdmin

```
classDiagram
    class ModelAdmin
    class GroundSegment_admin_UnitOfMeasurementAdmin["GroundSegment.admin.Unit OfMeasurementAdmin"]
    GroundSegment_admin_UnitOfMeasurementAdmin --|> ModelAdmin
```

The diagram illustrates a class hierarchy. At the top is the 'ModelAdmin' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name 'ModelAdmin', while the bottom two are empty. Below it is the 'GroundSegment.admin.Unit OfMeasurementAdmin' class, represented by a shaded rectangle with three horizontal compartments. The top compartment contains the class name, and the bottom two are also shaded. A blue arrow with an open triangular head points from the top compartment of the lower class to the bottom edge of the 'ModelAdmin' class, indicating an inheritance relationship.

GroundSegment.admin.Unit  
OfMeasurementAdmin
